Platform: Windows AIO Audio CD Creator is a lightweight Windows application whose purpose is to help you rip audio CDs and create new ones as well. Simple looks You are welcomed by a clean and minimalistic window that allows you to select between three tasks, namely create an audio CD, extract audio streams from CDs, and burn MP3 disk. Each of the aforementioned jobs comes with its own set of configuration settings. Rip audio CDs AIO Audio CD Creator gives you the possibility to select the drive and export the audio streams to MP3 file format. You may also query an online database (freedb) in order to retrieve metadata for the songs stored on the disk. Create audio and MP3 CDs The utility helps you burn audio CDs by creating a list with files, specifying the preferred song order by moving items up or down, and deleting files from the list. In addition, you can set up disk properties, such as composer, genre, message, performer, songwriter, and title. The log panel records information about all actions and possible errors, and you may save the entire list with files and configuration settings to a project file on your computer so you can burn data in the future. Bottom line All things considered, AIO Audio CD Creator comes packed with several handy features for helping you rip and burn audio CDs, as well as generate MP3 discs. On the downside, it hasn't been updated for a long time, so you may come across bugs if you install it on newer operating system. We have tested it on Windows 8.1 Pro and experienced some errors upon trying to rip audio tracks and opening the configuration panel.
