What's New in the?

Incorporating a revision history in your drawings makes it easy to track and view every change you have made in a drawing. Use Markup Assist to discover and edit drawings. It works on a new set of 3D objects that help you easily access and edit your drawings. Access various types of data in your drawings, including link types and various associations. Incorporate data from third-party systems and enable collaboration on your designs. Use AutoLISP to import work from the web. The new AutoLISP Export function makes it easier to export web data into drawings. Work on your design in new user-friendly native web browsers that are accessible through the Windows 10 Start menu. Visio® Visio® Connect continues to expand and deliver the same level of feature-rich functionality that you've come to expect. Get access to the latest Visio maps, including smart maps, a new feature that provides multiple maps based on geographic locations. Create a 3D model of the area you are viewing, and view a topographic map of the terrain in the same model. Create maps from points, lines, polygons, and curved segments. Generate maps in various view types: plan, profile, profile with labels, and bird's eye. Use new voice commands to easily interact with Visio maps. Create reports, schedules, and professional presentations from your maps. Excel Excel got a major update this year, and it's designed to help you get more done in less time. Now you can easily manage multiple workbooks and spreadsheets in the same document, and it's faster than ever to work with data from multiple Excel files. New in Excel: Create multibook workbooks, where you can separate the primary data source from its analysis and modeling. The primary data source is always connected to the primary workbook, but you can easily switch between models that are connected to different secondary workbooks. Create a second Excel workbook for the same dataset to enable multiple analysts to work in the same data, for faster collaboration. This also makes it easier to track changes in the same data, because you can easily switch between workbooks. Freeze the datasets you are not currently working with, so you can focus on your current task.
