Development tools Other CAD tools include: Design Development Studio (DDS), which was originally called CDD, is a set of tools that support both AutoCAD and MicroStation, as well as a number of other Computer-aided design (CAD) applications.

---

AutoCAD R12 and later versions incorporate DDS, while earlier versions such as AutoCAD R11 support only the MicroStation parts of DDS. AIMP (Autodesk Interactive Media Productions) is a software development kit for the .NET platform that is available on the Windows Store. Interactive features

Most users of AutoCAD have at some point in time used the "AutoCAD Tips and Tricks" feature in the product. AutoCAD 2011 introduced a number of other features, including:

An updated number panel that displays not only the number of CAD

---

objects on the screen but also the number of objects that are within a specified tolerance distance of the current point. Improved draw tool tracking. A "Reload last active drawing" button on the main menu bar. This allows for quick changes to be made to a drawing without having to reload the drawing. The ability to annotate and tag drawings in DWG, DWF and DXF format. A timeline feature which allows the user to visually see when a drawing was first created, updated and finalized. The past few months have been hectic for NASA, preparing for the eclipse in India. The media has been campaigning for the Indians to witness the first ever solar eclipse

---

since the new millennium. The summer of 2012 has been hectic for NASA. The NASA team was preparing for the lunar eclipse that swept across the American Southwest. But the eclipse didn't happen as the Moon passed behind the sun and disappeared. The Indian eclipse is one of the biggest events in human history, and all eyes are set on India. The NASA team has been preparing for the eclipse for the past three years. In total, the eclipse will last a little over 2 minutes, and the eclipse will be visible in parts of India for just 8 minutes. For the rest of the

---

world, it will be under the moon. This is the first time in a century that an eclipse of the sun will be visible on the earth. It will be the first ever total solar eclipse seen by humans in India. On August 21, the Moon will set just as the eclipse begins and make its journey across the sky. For the Indians, all this might be a spectacle, but the rest of the world will be blinded by the Moon, until the eclipse is done. At that time, the Moon will leave, and the Sun will peek out from the edge of the Moon. The eclipse will be a sight to see,

Multiple users can edit the same drawing at the same time. Draw simple geometry with the Snapping tool, or use a command directly in the Snapping toolbox. (video: 1:44 min.) Inventive drawing. Reference import and viewing: From one tool to another. Start editing a 3D drawing in your 2D Drawing Area. The Copy Sublayer tool lets you copy a drawing layer to multiple layers. Now you can keep the original drawing visible while you edit the copy. The Edit Path tool lets you quickly edit paths. Path dialog and intelligent assist: A

---

new path dialog in AutoCAD lets you draw and edit paths quickly. In addition, intelligent assist gives you the tools you need when working with paths. New tools: Layers. Enhanced block management. Expanded Drawing View: New drawing window functionality to help you design and edit drawings. Auto-expand and collapse all block properties, groups, and layers in the drawing window. Draw strokes, polylines, splines, and arcs. Lasso, shape-selection tools, and a revised geometric-selection tool. A new Direct Selection tool lets you select groups, blocks, and layers, and

---

lets you move, copy, and rename them. The Selection Wizard and Ink Tools help you select the objects you want, and apply selection and ink-based edits to them. Enhanced touch performance. New Shape Dynamics: Extended and more intuitive Polyline dynamics. A new dynamic tool box helps you pick the correct dynamic. Auto-detect and automatically apply: Dynamic Properties, Auto-Detect, and Auto-Enable tools for all objects. You can create a dynamic Group with no properties, and then apply the properties of the shapes it contains. A new Dynamic Sketchpad panel makes

---

it easy to create new drawing commands on the fly. Reflected Dynamic editing: Reflected Dynamic editing makes it easier to create drawing commands. You don't need to create a dynamic sketchpad and define every command in a specific order. Instead, you can use a standard dynamic sketchpad and create each command as it is needed. New 3D Parameters and a revised 3D Modeling window.
