EasyDock is a tool for quickly adding/removing the panel dock, giving you access to all the programs and files you use often. This dock remains in your system tray. It will work with standard and its own DockbarX. Another great feature is the ability to go directly to your favorite folder from the previous or next opened folder. Once you do, you can also quickly minimize all programs and files to the task bar. Even better, this tool is easy to customize and can be managed by any user in the administrator group. The main window of EasyDock is completely clean and simplistic. All the necessary information can be found under the tabs. The name of the application, the source and the version are shown in the upper right. Below the title of the application and the logo of the author can be seen. You have the ability to add items to the dock and hide the tabs if you want. EasyDock features a powerful options window that lets you customize its functions and appearance. It comes with a bunch of themes for you to choose from and you can even personalize the window in any way. By default, the list of programs and files in the search panel is sorted alphabetically but you can sort this list either by name, size, date or timestamp. You can also enable the search history to put it all back in place when you open the application. The status bar keeps you informed about the current items being worked on. The dock also features a minimize button that lets you completely hide the icons you have minimized to the task bar and the panel. The image of the taskbar button can be set or disabled. EasyDock ships with an icon pack editor, a clean interface and, of course, it comes with a bunch of themes that can be easily set. Application easy to use and manual and intuitive Windows management of storage formats. Therefore, given that its interface is not limited, the user can save all the necessary data in its disk with ease. It allows the user to create a password, which can be used in order to access any of the files, and you can also set the size of files (in bytes) to determine the volume storage, as well as the location (folder), file types and encryption method. The latter feature creates a backup before the encryption and additionally, it makes the designated files inaccessible, so you can't recover them. No matter what type of backup files you have, there's a high probability that a Windows 8.1 Support Team will be able to resolve most of these issues. It is also worth mentioning that an e-mail is automatically sent to the Support Team whenever one of your files becomes inaccessible. Since this application is designed with regular users in mind, all of its functions are intuitive and very easy to use. The only drawbacks of this application are that its user interface is user-unfriendly, as well as the fact that many of its functions are only accessible if you have a certain level of computer expertise. However, at the time of writing this review, there's a free version available that hasn't been updated for over a year. Nevertheless, this type of limitation can easily be avoided. The real value of Xponent Manager is its ability to create databases for clients with special needs, as it enables them to personalize the database according to their preferences. The program is not only convenient for online businesses but is also of great use for small and medium-sized companies that need to manage several clients on a daily basis. It is definitely a more complex software with a ton of features, so you need to be patient when it comes to getting to grips with the application. Nonetheless, once you get used to it, you will realize that it is fairly easy to use. Xponent Manager gives a chance for you to manage all of your clients and their issues in one single location, with a lot of information that allows you to easily identify any problem with each client. You can easily contact clients or resend their errors, such as forgotten passwords, invalid e-mail addresses, technical issues, etc. You can also manage your inbound calls and handle all of your clients' transactions together, all from a single space. The program can be used with four different ways: Synchronize
