What's New In?

LiveChat is an award-winning live chat software that enables your customers to directly interact with your website visitors. It helps you quickly resolve issues and increase sales with real-time support from your website visitors. It's a feature that can significantly increase your customer satisfaction, make you stand out from the crowd and increase conversion rates. Features: The video chat feature can be embedded anywhere on your website with a live chat button. The button invites visitors to a simple chat window where they can ask questions or give feedback. The chat window contains features like visitor monitoring with geographic location identification, IP address, referrer, visited pages, and more. It can also be linked to your e-mail and phone numbers so you can communicate with visitors via several channels. Requirements: The LiveChat software does not require plug-ins or third party software. The LiveChat button can be placed anywhere on your site and is compatible with all major browsers and platforms. For Windows: LiveChat offers a desktop application for both 32-bit and 64-bit systems. You can choose to run the application either as a service or as a stand-alone application. LiveChat also supports ActiveX for remote access and monitoring and POP3 for e-mail communication. For Web: LiveChat offers a web-based version that can be used with all major web browsers. It can be installed on your own web server or be hosted on the LiveChat.com website. There is no software to download or install, and the client does not require a plug-in, Licensing; LiveChat offers two licensing options, 1. Enterprise - allows for up to 100 seats, 50 concurrent concurrent users, and 1 GB of storage on the customer side. 2. Standard allows for up to 10 users.
