SILVERFAIT STUDIO PRO is a fast and easy to use image processing software for the PC. This program allows you to adjust color, brightness and contrast of your digital photos and scans. A new approach has been created with a new interface and drag-drop method based on the direct point and click method. This results in less input/output interferences and less problems with the program. Now you can resize photos or create images from a picture by just dropping an image into the program. SILVERFAIT STUDIO Plus is SILVERFAIT STUDIO PRO Plus with even more advanced functions. It is packed with many more useful tools for adjusting your photographs with accuracy and ease. These functions include image lifting, pixel replacer, cropping, image rotation, image mirroring, image merging, image deletion, image preparation, auto exposure, auto brightness, auto contrast, auto sharpening, and many more. What's new in SILVERFAIT STUDIO Plus: - Now you can enlarge photos in SilverFast Studio and quickly access them. A new drag-and-drop method has been added to the program. Drag a photo from your desktop to the program window and drop it into the program's media grid. You can also copy photos to the program window using copy to, and you can select different paths when you have a large number of photos (from separate folders, etc). In addition, the program is now capable of uploading files from the program to other applications. The creation, editing and preview of new photos is facilitated. - SILVERFAIT STUDIO now has a new dialog for batch processing (from photos or other file types). You can now create a new media grid or select photos individually with the program. - SILVERFAIT STUDIO PRO will now have a new dialog for batch processing (from photos or other file types). - A new program-specific keyboard shortcut has been added. By pressing CTRL-C or CTRL-O, you can now close a dialog. This shortcut can be changed in the application settings. "Your software is absolutely great. It has the ability to process and edit images that I could not do in Photoshop. The number of customizable features are amazing: I will definitely use your program in the future. A+" "I have tried many different color and image processing software on multiple platforms. Your product is by far the most user friendly and most complete to date. Even though I have been using Image
