What's New In?

Simple Bars is a Rainmeter skin for Windows that enables you to quickly access the disk space, the CPU and RAM usage, and network traffic of your computer. It also comes with a simple launcher that allows you to easily access frequently used programs and folders on your computer. The skin's visual appearance is minimalistic, in order to make room for the details of your computer's actual status. Additionally, Simple Bars features a beautiful light-themed animation that will enhance your skin's overall appearance and create an impressive effect that will set it apart from the competition. Simple Bars doesn't include any visual customization options and comes with a default color scheme that you can change by right-clicking your skin's background. However, you can easily change the color of the three skin elements -- the bar itself, the bar highlight, and the menu buttons -- as well as the color of the bar's shadows by using the New Skin Builder, included with Rainmeter Studio. Simple Bars also features a clock and weather widget, which can be disabled by right-clicking their icons. Requires: Rainmeter Requires Rainmeter Studio Requirements: Windows XP, Vista, 7, 8, 8.1 Key Features: - Automatically accesses and updates the disk space, CPU and RAM usage, network traffic, and selected applications and folders - Real-time monitoring of all the mentioned information - Provides detailed information about each of the mentioned items - Up to date, highly accurate information - Works with Rainmeter 5.3 and later - A simple launcher with search and Favorites functionality - Real-time monitoring of the disk space, the CPU and RAM usage, and the network traffic in all running applications - Accesses the selected applications and folders in the launcher - Displays the selected folders in the launcher as sub-folders of the Desktop - Different color schemes available - Supports the macOS and Linux operating systems - The skin is light in visual appearance - Offers a simple animation and a beautiful light theme - You can customize each of the mentioned features - Offers detailed information about each of the mentioned items - Very accurate information - Works with Rainmeter 5.3 and later - A simple launcher with search and Favorites functionality - Real-time monitoring of the disk space, the CPU and RAM usage, and the network traffic in all running applications - Accesses the selected applications and folders in the launcher - Displays the selected folders in the launcher as sub-folders of the Desktop - Different color schemes available - Supports the macOS and Linux operating systems - The skin is light in visual appearance
