Virtorio Address Book is a program with a pretty self-explanatory name - it allows you to create an address book from your contacts. It can be easily figured out, even by inexperienced users. The interface of the application is based on a standard window with an intuitive layout divided into two panes - one for the contacts and one for inputting contact details. So, you can write the contact name, nickname, email address, secondary email address, website, phone and mobile number, address, zip code, city and country. Adding an entry to the contacts list can be seamlessly done with the click of a button. In addition, you can modify or delete an entry, search for a contact in the list and enable Virtorio Address Book to match cases, backup and restore the address book, as well as sort items in the list in an ascending or descending order. But you may also hide tooltips and enable the tool to add contacts to the database even if the email address field is empty. Another feature of Virtorio Address Book allows you to create a report from the entire contact list or only selected entries, in order to print it or export it to HTML or RTF. The program requires a small amount of CPU and system memory, has a good response time, and supports keyboard shortcuts. We have not experienced any issues during our testing; Virtorio Address Book did not freeze, crash or pop up error dialogs. On the other hand, its features are quite limited, although we must keep in mind that the app has not been updated for a long time. The program is a comprehensive address book created with a strong focus on stability and usability. The time on your phone is valuable. What's New in the Virtorio Address Book?

QUEZON.IM is a program that allows you to store and retrieve your information in a basic but convenient way. Its interface is based on a standard window with an intuitive layout divided into two panes - one for contacts and another for inputting the information. It is not necessary to type the details manually, however, you can type a suggested value or choose one from a list of predefined options. So, you can write the contact's name, nickname, email address, secondary email address, website, phone and mobile number, address, zip code, city and country. You can use a dropdown list for selection of options for the above fields. Adding an entry to the contacts list can be done with the click of a button. You may also modify or delete an entry, search for a contact in the list and sort items in the list in ascending or descending order. Apart from the functionality inherent in the interface, there are certain useful functions - You can activate a tooltip that will appear when you hover the mouse pointer above a selected entry, which allows you to view additional information about that particular record. You may also enable Virtio Address Book to automatically add contacts to the database even if the email address field is empty. Another feature of the app allows you to create a report from the entire contact list or only selected entries, in order to print it or export it to HTML or RTF. QUEZON.IM has a quick response time and does not require a lot of system memory. Its features are more than sufficient for the average user, so we do not have any complaints about it. On the other hand, the app is a very basic program with limited functionality; for example, it does not have any intelligent searching features. QUEZON.IM Description: WhatsApps is a program that allows you to send messages to any number of contacts, with the method of calling, the possibility to leave a voice mail and the ability to exchange photos and videos. The interface of the application is based on a standard window with a simple layout divided into two panes - one for the contacts and one for the input of your contacts' details. If it seems to you that Virtorio Address Book is trying to compete with WhatsApps in the area of offering an advanced user interface, you might be right. So, the basic buttons, icons, layout and options are similar to the app's. The software allows you to add a contact, change their nickname,
