## Network Inventory Monitor Crack Free (Latest)

## Network Inventory Monitor Crack + Free

Network Inventory Monitor is a network manager which allows you to inventory your remote computers. The program allows you to collect data about network computers such as: installed service packs, hotfixes, hardware, installed software and running processes. You can get screen shots from remote computer and send message to remote PC. You can create reports about hardware, installed software and running processes on computers in your local network. You can get a list of installed software, whether it is in use or not, by version number or product name. You can also monitor other components like ports, hardware, RAM and hard disks. All installed software can be easily updated. It is also possible to hide the window on the remote PC or create tray icon. Built in Scheduler: You can easily create schedule for data collection. For example, you can monitor your remote PC at work for a week. You can schedule the date for a collection, time interval and can start monitoring on the selected date. Password protection: Network Inventory Monitor comes with strong password protection. You can set up passwords to protect your data. You can add some extra passwords to help you in case of a user forgetting the password. All in one
