. 4. Click NEXT to continue the installation. 5. Install the product when you are ready. Once installed, click Finish to close the setup program and run 3Dmax. 6. Click on the Render Setup tab to open the Render Setup window. 7. Click on Production Setup, and then choose Production Rendering from the list. 8. Click OK and on the next screen, choose "SRGB" for rendering. 9. Click OK, and the SetRGB procedure will take place. 10. Select the "Vray Textures" option from the "From File" menu and browse to your preferred.[Transapical coronary artery occlusion during the biventricular implantation]. Implantation of a biventricular assist system is a new therapy for patients with heart failure. This study assessed the feasibility and safety of the coronary artery occlusion using a balloon. The target site of the balloon was determined using the trajectory measured on computed tomography. Transapical balloon occlusion of the left anterior descending artery was performed in 10 patients (mean age, 57 +/- 13 years; seven male patients). The mean size of the balloon was 7 +/- 2 mm. A successful occlusion was achieved with good position in the target area in all patients. Transapical balloon occlusion of the coronary artery was easily and safely performed without serious complications.Nanotechnology General News The latest news from academia, regulators research labs and other things of interest Posted: Sep 20, 2013 Light that travels faster than the speed of sound? (Nanowerk News) Whether it's light going faster than the speed of sound or sound going faster than the speed of light, this week's Nobel Prize in Physics was awarded to two groups for their achievements in a new branch of physics known as the extreme physics frontier. The Nobel Prizes, which were announced Monday in Stockholm by Rensselaer Polytechnic Institute Professor of Physics John Pendry, are awarded annually "to those [physicists] who... have conferred the greatest benefit to humankind with the discoveries made during the preceding year." Pendry, who is the James T. McGregor, Jr., Professor of Physics, won this year's Nobel Prize for his work in the area of metamaterials, which is the study and synthesis of materials with properties not found in nature. He has been pioneering 82138339de
