Air Messenger Pro [2022-Latest]

Air SMS Pro is a free and powerful tool which allows you to send SMS from Windows Mobile phones, smartphones and laptops using the cell phone network, use internet connection or use your computer to send text messages to a mobile phone worldwide from anywhere in the world. You can send text message to any number, as long as you have the full number in your contact list in your phone. If you do not have the full number in your contact list, you can add it from the Internet. This allows you to send to any phone worldwide through wireless data network, pager and cellular phone which use GSM, TDMA, CDMA, or Personal Communications Service or PCS (cellular) technology. Air SMS Pro is the best SMS software for Windows Mobile phone. It is compatible with Pocket PC 2002/2003, Pocket PC 2003 SDK/2003 Gold, Smartphone 2003/2004 SDK. You can customize the preferences, notification sounds, and deliverable methods for every SMS you sent. Send texts in batches and modify the message sender address, phone number, and timeout. You can also choose to either deliver the message immediately, or to queue it up for later delivery. You can also set the text message to be sent using one of 4 ways to deliver the SMS message, including SMS, email, MMS, and Broadband. Air SMS Pro Features: * Send SMS messages from Windows Mobile devices * Send SMS messages from laptops with Windows XP, Windows Vista, or Windows 7 * Send SMS messages using a phone or modem to phone calls in a sequence, an automatic sorter, a schedule, a customized message delivery method, a phonebook, or a file. * Track all SMS you send * View and manage the SMS messages sent * Automatic form filling and editing your messages before they are sent. * Easy to install and setup. * One click to make SMS and to send SMS. * Easy to use, compatible with Windows Mobile. * Multi-format supported Smart SMS Pro & Pre-SMS is a powerful, yet simple to use software, which allows you to send SMS from Windows Mobile phones, smartphones and laptops using the cell phone network, use internet connection or use your computer to send text messages to a mobile phone worldwide from anywhere in the world. You can send text message to any number, as long as you have the full number in your contact list in your phone. If you do not have the full number in your contact list, you can add it

What's New in the?
