What's New in the PNG Mask?

Are you looking for a steganography tool that lets you hide data within PNG files? PNG Mask is a Windows application that enables you to encrypt messages, files and even links to files. All that is needed is a source PNG file and a password. Key Features: Steganography methods: + EOF, IDAT and tEXt You can use steganography to hide any type of files within a PNG image. PNG Mask can hide plain text, pictures, binary files, URL lists, software or just about any kind of data. Sharing with links and e-mails: The magic of e-mail is that no one knows the contents of a message before it is sent, but with links and e-mails, it is easy to "share" a message that includes sensitive information or links to software that could potentially infect your PC. You can use steganography to hide a few words, a picture, any type of text or even a whole text file. PNG Mask supports EOF, tEXt and IDAT steganography methods. Steganography as part of e-mail can be used by sending a message containing a link to the file containing sensitive data. Receive e-mail messages and attach images: Get e-mail messages with images attached. View the hidden text in an image file: Use the steganography to view the hidden text when opening the image. PNG Mask requires Windows 2000, XP, Vista and 7. Virus protection: This application is free from viruses and will not affect your PC in any way.
