by IS Shehu Â· 2021 â€“ Gaze-tracking systems have evolved into interactive gaze-based systems. 1.6â—†. Desktop, 1 webcam. PC-EU, GP, Mesh. [61,101,128]. This is not the first "look", but the first one that hit the target. The second shot was "Eye Catcher" - a program that, as claimed, allows you to find out which user, which social network belongs to, who he follows on this network, and where he is (this required taking a snapshot of the user's image on the web). page). The program has received more than 2 million downloads, and its price at the time of release was only \$319. By 2010, the number of downloads exceeded 20 million.
