Markup Assist gives you a tool to see changes made to your drawings automatically and save the changes to your model. You can use assist to quickly and easily review many changes and eliminate drawing errors without impacting your workflow. As you draw, you can assign markup to your drawings and review it later. Once your drawings are complete, you can release the markups as comments or review them with others through AutoCAD. (video: 2:00 min.) Use markup as a workflow tool for accurate and efficient drafting. Markups save you time and help ensure you are capturing the true intent of your drawings. Markups can be used to communicate with other design team members and save them from making multiple drawings to view a complex design. Markups can also be used to give feedback to the modeler, and make it easier to view and correct drawings. The Design Review Utility (DRU) provides a comprehensive suite of tools for working with markup.
