Garfield 2 Tamil Dubbed Movie 14.Q: How to setup sharepoint development environment on windows How to setup a sharepoint development environment? I use MS Visual Studio 2005 & Sharepoint 2007 development. What I do is I create a sharepoint project, add it to the solution. Then I setup IIS with Web Sites, Content Databases, Application Pools, etc. Then I test the connection. I try to create an application, but nothing happens. What I am missing? A: There's a few things you are missing. You need to set up your site's application pool. Also, you need to create a content database for your site. One site can have only one content database. This article walks through the process of creating a site from scratch: As demand for telecommunications increases, fiber optic cable limitations in the construction of new optical fiber cable networks is creating a demand for new methods of carrying telecommunications signals. A proposed system for telecommunications is a so-called "ring system." In such a ring system, a central office (CO) or central office switch (COS) has two optical fiber cables extending therefrom. Each optical fiber cable is then broken into two optical fiber cables each of which extends generally
