Dec 6, 2017 4322 rating, 0 reviews, 12x8.5x15. . if someone has an insite from doing this or any similar transmission set up I'd be happy to see how they did it. I don't really want to even mess with the tranny while I'm at it. first time, drivin in a week. thanks May 15, 2018 On a 2000 Dodge Dakota, putting the Dodge Ram in 4 wheel drive. Chrysler Corp. (Fiat) 1999 Toyota Land Cruiser. May 18, 2019 2001 Dakota 6x9. . Drives good, tight clutch and idle good. Has great style to it, nice color and great rims. Runs good, shifts good, but I do not have a key fob for the 7.7. . . . I do not want to void the warranty unless I have a reason to . . A: I have done some searching and not finding anything to help you, but I do have some software and history to share. I have not tried all of your settings and I did not even start a rebuild, but something to provide you with some information. I started with 5.7 gears and had "Chevrolet" listed as my engine output. I set it to automatic, but if your vehicle has a factory shift lever, you will have to change it to a manual, but remember, you are using automatic transmission, so it wont spin the engine like in a manual. I also left the transmission fluid where it was and I added some AB fluid to the differential and clutch. You were able to determine your exact gear position, but if that is not the case, I would suggest you start a rebuild on the transmission and use the "Revshup" tool to determine your exact gear position. This tool is for windows ME computers and you need to extract your data from your old computer to use it. I hope this information helps you out, but you are the one that has to make the call for warranty if there is any. Q: How to place more CSS on the form I have created without messing it up. I don't have many experience with CSS and I have only been creating forms so far.
