ABC Amber LIT Converter With Registration Code X64

ABC Amber LIT Converter is a reliable application designed to convert LIT files, produced with Microsoft Reader to a wide array of document formats. It also features support for batch conversions, as well as use from command line. The list of supported output formats includes, as follows: PDF, DOC, HTML, WPD (WordPerfect), HLP, RB (Rocket e-book), PDB (Palm), RTF, CHM, FB2 and TXT (both Ansi and Unicode). It can also export LIT data to the clipboard, if ever in need of this option. ABC Amber LIT Converter sports a simple, yet pleasant appearance, with a stress on functionality rather than looks. Most of the user interface is dedicated to the list of files to be converted, as well as to the export selection. Adding the files can be achieved in two ways: using the dedicated menus and buttons, but by drag and drop too. The next step is to choose the output format; for some of them, the app features some extensive options, which can be accessed from the Preferences window. For instance, if your output format of choice is PDF, you'll come across a variety of settings related to document information (title, subject, author, keywords), page size and orientation, password protection, compression and resolution. On the other hand, if you opted for CHM or HLP, you will be able to edit title and copyright information, language, font, and compression settings (HLP only). Moreover, HTML export operations can be customized by setting the image quality, as well as by enabling CSS conversions. A major upside is the application's speed during the actual process, being able to convert over ten heavy documents in under a minute. It's also impressive that it remains resource-friendly while doing so. To sum up, ABC Amber LIT Converter is a decent and reliable choice if you want a speedy LIT conversion tool. It exceeds the basic capabilities of similar converters by providing advanced output options for some of the formats.
