When the Apple II personal computer was first introduced in 1977, it required a separate digital imaging device known as a photo scanner. However, over the years, the use of personal computers as CAD platforms has grown. The use of CAD software on the Macintosh OS is becoming increasingly popular. In 2014, an international survey of over 400 design and drafting firms revealed that 48% of respondents use CAD on Macintosh computers, 30% use CAD on Windows PCs, and 10% use CAD on Linux. Of those firms that use CAD on Windows, an additional 9% use CAD on a Macintosh computer and 5% use CAD on both a Macintosh and Windows computer.[1] In 2009, Autodesk announced that the 2010 release of AutoCAD, AutoCAD LT, and AutoCAD Architecture would only support 64-bit versions of Windows. The 32-bit version of AutoCAD 2009 was still supported until April 2014. Autodesk's support of 32-bit software ceased on April 11, 2014, when AutoCAD 2014 was released. In the Autodesk Technical Review the new AutoCAD release is announced as "AutoCAD 2014 Release 2". In early 2007, Autodesk began to offer AutoCAD as a hosted service. The company claims that this reduced the total cost of ownership and increased the speed and scale of their customers' workflow. On June 11, 2009, Autodesk announced a new version of AutoCAD called AutoCAD 2009 Release 14.3 that is designed to work on both 32-bit and 64-bit Windows operating systems. On April 11, 2014, Autodesk announced that the 2010 release of AutoCAD, AutoCAD LT, and AutoCAD Architecture would only support 64-bit versions of Windows. The 32-bit version of AutoCAD 2009 was still supported until April 2014. AutoCAD 2019 Release 3, a 64-bit version for Windows, is the latest AutoCAD released by Autodesk, and is able to run on all versions of Windows 10. CAD software has traditionally been expensive, typically running in the range of \$1,000 per license. However, as CAD software has become a more widespread requirement for many companies, the high cost has continued to deter many organizations from purchasing it. The cost of purchasing AutoCAD is similar to that of purchasing a car. In 2004, CAD vendor Autodesk announced a new CAD pricing model, called AutoCAD
