Interleukin-1 (IL-1) is a cytokine that plays an important role in inflammatory and immune responses. IL-1 has been suggested as one of the factors responsible for dentin resorption in patients with induced pulpal inflammation and pathogenesis of experimental pulpal inflammations. The present study aimed to clarify the IL-1 beta and IL-1 receptor expression in human dental pulp, as well as their responses to inflammatory stimuli. Reverse transcription-polymerase chain reaction was used to determine the expression of IL-1 beta and IL-1 receptor in the dental pulp of human third molars. IL-1beta was weakly expressed in the pulp tissue of normal teeth. During pulpitis, the expression of IL-1beta was enhanced, especially during the early phase of inflammation, whereas IL-1 receptor (IL-1R) mRNA was expressed at the pulp horn and in the odontoblastic layer of the pulp. These results suggest that IL-1 is involved in the response of dental pulp to inflammation, suggesting a local effect of IL-1 in pulpal tissue. Q: Is there any way I can get the current Uri.PathInfo of a request in a Razor MVC view? I have two views, one is a route, one is a page. I need to do something in the different views depending on if the path starts with the route or the page. In the view that starts with the route, I need to change the Action method. In the view that starts with the page, I need to change the controller name. I'm doing this via the OnActionExecuting method in the base controller protected override void OnActionExecuting(ActionExecutingContext filterContext) { var routeUrl = RequestContext.RouteData.Values["controller"]; if (routeUrl == null) return; var context = RequestContext.HttpContext.Request.PathInfo; } However, it seems like I can't see the path info, when I was expecting it to be right there. I can see the corresponding RequestContext.RouteData.GetCurrentValue("controller"

Long ago, the High Tsar, the Vlad the Impaler, was a mighty empire.The Eastern part of his kingdom, called 'Tenebrosia,' caught the attention of King Arthur, who decided to invade it.The High Tsar, knowing that his empire was not yet ready for a war, was not willing to risk an invasion.However, after several months of fighting for the lands of Tenebrosia, King Arthur had already conquered almost all of the lands, which were located north of Russia. In 1077, the Tsar gave his son, Alexander Nevsky, a war plan for Russia, naming him as heir to the throne.The mission was to conquer Tenebrosia and liberate the lands that King Arthur took from Russia.The Tsar's plan worked with little difficulty.They conquered the lands without any problem, and set up the rule of Tsars in the lands of Tenebrosia.Almost fifty years later, Russia had extended its borders to the Pacific ocean, and Russia was now known as 'Russia.' Been busy with college and can't really find the time to do much fan art, so I don't like telling you guys when I will be able to post up some fanart. Also, I'm missing some of the fan art I've done, so I can't tell you when I'm going to get them posted. If you have a story and you want me to get it posted, leave a comment and it'll get posted right up :) Saturday, September 13, 2009 Hey guys, sorry for the lack of updates lately. When I finish my fanart and I'm not sure whether I'm going to post it or not. I'll let you guys know. Before that, I got the first watchable episode of Saints Row the Third last week. Be warned, there will be plenty of spoilers :) I'll post up some fanart of it sometime this weekend, but I have a bit of a busy schedule this weekend (as far as comics go anyway) so I'm not sure when I will be able to post it up. My time here is much more limited and I have a lot of stuff to do, so I hope you guys understand. I'll try to make a post after every episode of the first season comes out, but I'm not sure how long that'll take for me. Also, I
