The improvements made to the footballing experience will include a dynamic dribble mechanic, overhauled 'pinball physics' on through balls and improved player movement in multiple directions. These effects combined will create an enhanced gameplay experience with more authentic-looking and realistic on-ball movements. The game can be found on all platforms on September 13. Did you catch that? The game will be on Xbox One, PS4, Nintendo Switch and PC on September 13. Okay, so Nintendo Switch fans might have been a little bummed there - looking at you/us. What's new in FIFA 22? The official FIFA website said:FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. FIFA 22 marks the return of Charles 'Chuck' LeDuc, who had previously worked on FIFA 17 as a producer, senior producer and executive director of football. Another thing we learned about the FIFA 22 game is that it will feature 3D facial animations for the FIFA Ultimate Team mode. FIFA Ultimate Team 18 was released last September, so hopefully they have learned something from that and now we can see the full effect of what they have done with that.
