**CREATE & EXPAND:**The core gameplay of Fishery is very simple. You can create your own totally new aquarium from scratch. Populate it with your favourite species of fish and build an ecosystem with vibrant plants. The base set includes 200+ species of freshwater fish and 25+ seaweed types. The more the better! You can also decide to expand your range and start breeding your own fish.

**The art style:** With its highly stylized cartoonish style, Fishery takes influence from the art style of the beloved anime series, Pokémon!

**The gameplay:** Fish can breed and grow in your aquarium. And they breed when they are happy and contented and you can see in game how well the fish you have created are doing. You can breed your fish, in turn, with the ones you have.

**The details behind the breeding process** is not only fun to see but essential to have a successful aquarium.

**Fish Behaviour:** Fishery introduces a set of behaviours that your fish will exhibit in your aquarium. Observing your fish, you will be

---

able to know their moods and whether they are happy or stressed. Discover the background stories of every fish species in this game by reading the notes that will appear when your fish are happy and contented.

**Feeding:** Fishery is very easy to understand and use. You will only need to choose the food that you want your fish to have and they will consume it.

**Planting:** Grow plants in your aquarium. Watch them flourish as they gobble up the food that you provide.

**Pumpage:** Make sure that the water flow for your aquarium is correct. Introduce pumps and change the water flow inside your tank according to its needs. Just like the real world!

**Plumbing:** The plumbing system in this game allows you to control the exact water condition inside of your tank. Using the various pipes and pumps that exist in this game, you can maintain the water flow inside your tank according to your needs. So whether you like to let your fish swim around freely or have them stuck in a fluttery ecosystem. Just hop into this game and experience the world of Fish yourself!

### What's new:

**Fun and Fast Every weekend we venture out to find Pokémon in our home town. We try as we can to find as many as possible. We both are avid Pokémon Go players and excited for the release of Pokémon Sword and Shield! So far our mission has been a success :) Monday, March 31, 2016 I love dragons....and purple! Here are the characters that are only in Smash Hit within my "L" box. I understand that I need to clear out maybe a bunch of them to make room for the relatively small number of additions that I have in the "S" box and "I" box, but I can still find room for one or two more characters... am I alone? I hear ya! DRAGON IMP Korikaze HAMMERHEAD DRAGON WHERE TO FIND THEM: GO: Trade Up in the Market: Reward: 200 coins or 12,500 Stardust (not a lot!) According to good old Sparky's resource, the only place Dragon Imp and Hammerhead Dragon can be found at is in the trade-up queue in the Market. On my quest to get all four of**

---

**the Dragon type characters in Smash Hit, I have helped trade up a total of twenty-four Dragon Pokémon (plus a Mew). If you love puzzles and don't mind crashing, you can attempt to beat the game with this Dragon-type Pokémon in the seventh Gym. But you're likely to have to resort to cheating a little bit to get this character, and unfortunately the best way to cheat in Pokémon is to use Gold a LOT. Gold is a game-breaking item that lets you trade-up for whatever you want. So, if you'd like, I'd avoid the HGSS style option (getting Gold by reusing Pokémon Battles/contests during your game play) and instead use the route of just using Gold every day without doing any real battling or hunting for Pokémon. After defeating event contests, if there are leftover items like heart scales or the like, use them to get Gold. And be warned - If there are leftover items and you've finished the game, your Pokémon will revert back to normal, and you'll have to start at the beginning as if you've just purchased the game (not fun!).**
