Twitter: YouTube: Game Features: The award-winning Mario franchise has long been a pioneer of unique and entertaining game play. Today Mario continues to bring new and exciting ways to play to the platform by introducing Sub Mina Farm! Inspired by the popular Super Mario Bros. 2, Sub Mina Farm offers Mario's first aquatic adventure. Here, Mario must harvests vegetables and fight off the sea monsters that hinder him. As Mario traverses islands and ships, he must care for plants and catch cute sea creatures to collect. Together with the aid of some special power-ups, Mario can teach these creatures to become friends and earn coins. Collect enough coins and Mario will be able to purchase new fishing hooks to catch more coins and friends! Whether the upcoming Gameplay Features or the weekly posts are your thing, be sure to follow us on social media and stay up to date on the latest news from Interdigital. ## **What's new in Harvest Moon: Mad Dash:**

**Harvest Moon: Mad Dash is a platforming game developed by Neverland Productions and published by Tecmo in Japan on the Game Boy Advance, European Nintendo DS and North American Nintendo DS, as well as early versions of the Game Boy Advance Virtual Console in 2006 and 2007 respectively. It was released on the PlayStation 2 in the West in 2005. The game and its sequels were first announced on February 22, 2002. It received mixed reviews; critics noted the game's lack of appeal and low score in a genre where other games typically score in a higher category. Players reviewed the title more positively in early reviews, as the game gained a cult following.**

**Gameplay The Harvest Moon series is one of the few platform games where you navigate the game world by moving through different areas. It follows this concept of creating a traditional stage playing game, but with Harvest Moon being an RPG, it is not set in one scene and move from one area to the next. Gameplay is primarily centred around farming and gathering. The game features a single player story and 36 different 'story scenes' as well as a variant on those stages involving characters, known as 'mermaids'. Once a player has entered a scene, they must clear it by tilling a field, hunting for mushrooms and collecting fruit from trees. Characters can be farmed for fertilizer in between scenes. Some crops are planted in a collection of predetermined squares, usually in sets of four. Each patch of soil has a number, which does not change the amount of seeds required, unlike other games. The game begins with 140 growing stages, with more available depending on the part of the game played. Once the plot has been cleared in the 'story' scenes, the player can proceed to do the same in 'mermaid' scenes. Plot The game begins with the player's character being resurrected, informed that he/she has been sent to the woods to protect the Hollow Tree. After arriving, the player is confronted by Meteoth, who informs them that the tree was removed due to being evil. Meteoth informs the player that they must find and defeat King Hugar, in order to save the Hollow Tree and end the curse. Eventually, the player reaches King Hugar in the dark forest. To defeat him, the player must perform a specific set of actions, determined by what King Hugar is wearing. The latter actions are more difficult, being limited by their character's ability to harvest, so the player must choose**
