## What's new:

**Cat Jumper is a dark comedy black comedy film written by Irvin Kershner with film-making friends. The film was directed by Kershner and Jerome Charyn and released in 1983 by New World Pictures. The story is about a dingo poacher whose life gets turned on its head when his leg is crushed in a slabfall accident. He is introduced to an eccentric group of people who occupy a recently closed-down mental health facility which appears to have been abandoned by its inhabitants. The poacher is the only one to escape, and he finds himself at the centre of a complicated story of which he has no understanding. Production of the film began in December 1982 and it was not released in cinemas until 1984. It was film-maker's swan song in the Hollywood film industry, during which time he emerged as a major film director in the late 1970s and early 1980s and a key character in many successful films. Theatrical release Cat Jumper received its official U.S. theatrical release by New World Pictures as an R-rated double feature with Evilspeak under the title Cat Jumper - A Sensual Seduction! The film was entered into the 34th Moscow International Film Festival, where Irvin Kershner received an Honorable Mention in the Direction section of the competition. In total, the film was shown in 44 countries, including the United States, Europe and Japan. [From TIME Magazine]. Directing Cat Jumper was directed by Kershner and Jerome Charyn. It was released in December 1988, by Universal Pictures. In the 1989 movie Hot Shots! the character of Nick Farragut (played by Mel Gibson) plays a character based on the legendary film director John Huston. “She had long since lost the sleep of a normal child her age, and as the bedside clock told the awful hour, she did not feel surprised at the pale face, the staring eyes, and the convulsive tremor of the body. The last night mists were drawing their veil around the great old house and she could see the windows and doors which were closed, and locked and bolted.” You play as Ashley, a 13 year old girl trapped in an orphanage, who is facing a serial killer known only as The Collector. As the old house around her starts to crumble to reveal the evil horrors that live inside, Ashley must uncover her own past and make a choice that will change her life forever. A mixture of atmospheric and dynamic gameplay, enemies and puzzles that won’t allow you to be complacent, and a story with very strong bonds to those of Lovecraft and similar works. - Gameplay: You play through a non-linear adventure full of twists and turns. Character development takes the main inspiration from Resident Evil and the Silent Hill series but adds some of it’s own charm. You will have the full control of your character in a more fluid action game style than Resident Evil and Silent Hill combined. This will give you the chance to react to and avoid the dreadful foes you will encounter, going through different environments and faces. Exploration is strictly linear but the levels are designed in such a way that they will allow you to make your own choices and backtrack once you’ve made the right choice. They’re also carefully balanced so you can’t get to the end too fast, and you’ll need to solve many puzzles before the end. - Story: It’s based on an old short story called “The Shadow Over Innsmouth” written by H. P. Lovecraft. H. P. Lovecraft has often criticized the lack of attention the genre has received during its history, not referring to it as a genre per se but rather as “slasher games”. The story is only loosely based on the story, some of the events have changed dramatically, and some have been completely removed. A few notable changes are: The word “evildead” is used instead of “undead” because the author, Lovecraft, intended it to be a more solemn term, and to reflect the horror which the story evokes. The
