Equipped with PC-level graphics, the game boasts impressive graphics for the Android platform.Q: ionic 2 back button works on chrome but not on firefox and edge It appears that the back button on the ionic 2 app that I am working on behaves differently in chrome vs firefox and edge on windows 10. If you click the back button in chrome it goes backwards one page, if you click it in firefox and edge it goes backwards one page and then to the top of the page. I have looked at the history.push method and it appears that it works only in chrome. In my chrome it does this: If I click the back button in firefox and edge it does this: Here is my relevant code: tabnavbar.html Logout bff6bb2d33
