The American car manufacturer Ford originally wanted to build a T-Car in the United States. In 1927, a bus manufacturer named “Wiener Linien” initially asked for a chassis that could be used for a different type of vehicle and got it. It was a perfect match! To name the vehicle the “Ford T”, a more impressive shape was chosen than the original “T” design. That’s how it all began! After a few years of transition, the “Wiener Linien” bus service, featuring the “Ford T”, was restarted in 1935. In 1966, again after further modernization, the official name “Ford Transit” was adopted. At the beginning, this was an articulated bus, the name “bus” for this vehicle was derived from it. If all was said and done, the bus was exclusively used by the Vienna “Wiener Linien”. Besides the regular service, the vehicle also saw military use. In October 1970, the first of the modern buses with high-floor was put into service. The last of the original high-floor buses was still operated on December 31, 2002. In September 2000, the first low-floor bus entered service. They were exclusively used until 2001. In 2006, the last high-floor buses were put in service. In 2008, the first high-floor articulated buses were put into service. In 2012, the last high-floor buses, until then exclusively operated by the Vienna “Wiener Linien”, were put in service on the routes 18B, 18C and 18D. From 2013, the first low-floor articulated buses were put into service on the routes 18C and 18D. In 2013, the first low-floor buses, still exclusively operated by the Vienna “Wiener

Gameplay Guide: Mechajammer  
Mechajammer is a neon-fueled reimagining of the 80s / early 90s inspired by the world of cyberpunk. Players pilot titular 'Mecha-jammers as they traverse the underground tunnels of a ruined city, collecting treasure and disarming traps as they make their way to the source of the sonic infestation. Play as one of 7 Mechajammers and fight your way across 6 distinct levels. Grab enemy schematics and salvage for upgrades and powerful new weapons. Fly through enemy tunnels, jump ramps, and avoid obstacles and hazards. Conduct DNA scans on the diseased and insane - who knows what they'll unleash? Collect treasure and upgrade your gear, then build a 'Mecha-jammer of your own. The Original Soundtrack - composed and arranged by Kevin Balke. Total Playtime - 02:03:58

**.2 This is the first procedure to screen, disarm, and remove the external damage to your weapon after a trip through the smelter. Unlike the first part (see below) which only requires a rifle, this procedure requires the use of a pistol. This procedure should be done immediately after your rifle is disassembled. The differences between this procedure and the first procedure is explained below. Warning: 1. This procedure requires that you purchase the chemical waste disposal kit due to the extremely toxic chemicals involved. 2. This procedure requires you to remove your firearm from your holster. Do not attempt to conduct this procedure outside of a shooting range. 3. The barrel should be completely dry before disassembly in order to avoid the possibility of the barrel fusing to the shoulder. If your barrel appears wet or if your barrel is gloved before disassembly, then your barrel will likely fusing to your shoulder. The only safe course of action here is to wait until your barrel is dry. Steps: 1. Disassembly of your firearm for smelting should begin with the hammer down and the safety on. 2. Remove your firing pin and magazine from the firearm. 3. Remove your slide stop pin. 4. Remove your recoil spring and recoil buffer tube. 5. Remove your magazine by depressing the tab and pulling out the magazine. 6. Remove your firing pin from the trigger, but do not remove the trigger or the safety from the firearm. 7. Remove your front and rear takedown pins. The front and rear takedown pins are located above and behind the front and rear sling swivel studs respectively. 8. Remove your grip safety. The grip safety is located on the grip of the firearm. 9. Remove the magazine release button and your magazine from the firearm if it is still in the magazine well. 10. Remove the bolt catch. The bolt catch is located on the bottom of the feed pawl. 11. Remove the bolt cam. Remove your bolt cam with a TORX head screwdriver.
