THUMBS UP!

The game provides users with a number of different ways to interact with the game. Mainly, any kind of interaction with the game can be utilized in a manner that is useful to how the player is currently thinking. Any button on the controller can be used, as well as by selecting a button on the keyboard, the same button on the controller can be selected. The selection of a particular character will change depending on what button is pressed.

At the forefront of the game are the CORE actions. These are the actions that, when performed, will display different responses that are necessary. By the application of these actions, yourself or another character can achieve greatness.

When engaging in interactions through the selections, the CORE are your actions. Once performed, you will automatically respond to the current situation. Certain results are unintended and differ from what you would normally expect.

With this specific method, the actions can be freely combined. If the player presses the right and left buttons simultaneously as an example, a special CORE action will be activated that is generally used for switching characters, or switching an enemy to attack. The CORE actions are accessed from the 'Play Button'.

Thus, through the CORE, the player will be able to experience an immediate sense of customization. This method can be applied freely, and can lead to new series of reactions.
