Endoscopic investigation and management of entero-cystiophrenic fistula. We report on the management of a patient with obstructive jaundice and suspected upper gastrointestinal bleeding caused by an entero-cystiophrenic fistula. Endoscopic and surgical approach and the reported literature are reviewed. The successful therapy of entero-cystiophrenic fistula with an endoscopic approach is reported. The surgery for entero-cystiophrenic fistula could be replaced by endoscopic therapy. The definitive therapy of a rectal hematoma through a combined approach of endoscopic and surgical therapy is also presented. We believe that the endoscopic treatment of patients with a fistula is both the diagnostic and the therapeutic method of choice.

How the Regulators Work The commission oversees the administration of the Federal Energy Regulatory Commission (FERC) and the Public Utility Regulatory Policies Act (PURPA) and has a long history of working with FERC's electric generation and transmission divisions, working closely with the Energy Department's National Energy Technology Laboratory and the U.S. Department of Energy's Electricity Information Project. Since its formation in 1996, NERC has played a major role in enacting major energy policy for the United States. It has supported and advanced technological, security, and resiliency

initiatives that are protecting the reliability and stability of the nation's electric grid. It has successfully supported grid modernization by developing and promoting the coordinated development of the Electric Grid Code and the Grid Resiliency Standards. It has been instrumental in advancing the electric grid through addressing the operational and cybersecurity challenges of the grid. Furthermore, NERC has developed and promoted the integration of distributed generation (DG) resources into the nation's electric grid, most notably through the development of a grid-in-a-box approach, the integration of DG into the electric grid with electric vehicle charging (EVSE
