You can use the Office 2013-2019 Free Download tool to activate your Office. Unlike your retail,. Office software Microsoft. Know all about the software and. @color/colorPrimary

`@color/colorPrimaryDark @color/colorAccent`
false true

Q: How should I handle the duplication of `@-mixin` definitions within SCSS files? I have a large project and am seeing a lot of the same `@-mixin` code. How should I best handle this? I've seen people inline the mixin itself. `#main { @include some_mixin; }` But I'm not entirely happy with that. You see, what happens if I need to make changes? Do I need to go back to all affected SCSS files and inline them, and recompile? So what's the best way to handle duplicated `@-mixin` definitions?

A: You could use preprocessors such as Bourbon. Once you've installed it you can add `bower_components/bourbon` to your `bower.json`
