Server side PHP Encryption PHP encryption with IonCube Encoder 6 IonCube Encoder 6  
What is IonCube Encoder 6? It is a server side PHP encryption version that can encrypt php and non-php files (images, stylesheets, javascript, etc.). It is integrated with your default PHP installation. When the site is working with an ordinary PHP installation, the web site visitors don't see any differences. Their view of the web site will be exactly the same. Encrypted files are called IonCube. The files are encrypted in your installation folder, and are not visible to the user. When a visitor accesses to your site, the system loads your software and initializes the encryption and decryption cycle, encrypting all the files that will be processed by PHP. The files are decrypted and all the PHP instructions are executed. This process is transparent for the visitor. How To Use The Server Side PHP EncryptionWith IonCube Encoder 6? Simply choose the application and you're ready to go. The interface is easy, and intuitive. You just need to type in your password, and that's it. You're encrypted. How Much Does It Cost? 1 License is \$20 We have a promotion for the people that need an instant and affordable solution for the server side PHP encryption. We have a special discounted plan for our customers that want to protect their investment. \$20 / 1 License / Year New License 30-day Money back Guarantee \$20 For a limited time we are offering a special price for the new installations. Install or upgrade your server side PHP encryption today and save \$20! \$20 / 1 License / Year PCI encryption is the practice of encrypting the payment, billing and personal credit card data in such a way that it may only be processed by your site, even by yourself in your own time. It's the best way to maintain PCI compliance in a secure and private manner. We have many payment pages that contain the standard credit card processing method. This way the user will not be aware of the encryption process. We use both the encrypted and the standard method depending on the nature of the content of the site. IonCube Encoder 5 is an encryption plugin for PHP. It uses the IonCube technology to embed PHP code in a security wrapper. The encrypted wrapper is invisible to the
