The aim of this study was to assess the glossiness and color of ceramic brackets using a two-dimensional glossimeter and a spectrophotometer. Five ceramic brackets, namely Venus Advil, Venus Comfort, Demetron, Grandio, and Cercon, were evaluated with and without the use of a silane agent (Reactmer primer). Color changes in each group were evaluated using the color difference, which was determined according to the Commission Internationale de l'Eclairage (CIE) L*, a*, b* coordinates. The glossimeter measured the glossiness at two heights, 100 and 110 microm, and the data were assessed with the Human Visual System (HVS) model. Statistical analysis was conducted using one-way analysis of variance and Tukey's tests ($\alpha = .05$). Venus Advil brackets, demetron, and Cercon brackets, which were evaluated without a silane agent, showed statistically significant (P

webpage's author's id/name? I am trying to scrape reddit.

When I visit a page of a redditor's posts, I can click "favorite" next to the post, and it will redirect me to the user's account page. On the top right hand side of the page, there is their id, which I will use to get more info (name, reputation). But how to know the id from the new page? I have found that I can do it by using JavaScript, but I will need it only with the browser version 5, 0cc13bf012
