Vilayadu Mankatha Â· Yuvan Shankar Raja**K.G. Ranjith**Premgi Amaren**Rita**Anitha Â· Mankatha (Original Motion Picture Soundtrack) Â· One Way Â· MadukÂ .Q: Android app crash when opening it from phone (iOS client) I develop a iOS app that have working with Android and Android so we keep both projects but when we test from a phone, with Android project first, with the same idea i run the app from iOS phone, we got this error Error:Execution failed for task ':app:preBuild'. > Cause: java.io.IOException: Could not resolve resource @revision/mdpi/dpheight.png: (0) In this part of code it's where it crashes and it also crashes when I have this in place in spinner tag The project has taken from github so it's android when we are talking about bugs, and i tried to add res folder to files that caused error and it didn't change it i know this is not the best place to ask for questions but if anybody has the same problem and knows how to make it work, would be appreciated Update 1 All the images that were changed in the error message are actually not and don't have to change in your source code, and it's also not the best place to ask for questions, but if anyone has same error as me, that a what it's all about Update 2 Since i made it a bit clearer, here is the screen of what it's about A: Finally solved it, It's a bit silly but it happened. The extra file in the Project/res/drawable/drawable-xxx.
