Comments and Reviews I have already tried a few PDF sharing apps but there are no sharing options for Android phones. Until I found you, I was always having to share my documents with me from my computer/laptop. I have the same problem, simple sharing apps don't work for me either. I tried eReader and it was pretty good, I could "send" to my computer without data loss or downloading multiple files. I would recommend this app, it's the only one that works for me. I'll give you credit for sharing software, no reason not to. I just don't expect you to give me any money for it. I've downloaded over 30 albums in one session. It's very easy to use and the download speed is great. Mike S 2001.05.25 07:03 Business Growth I am very satisfied with the accuracy of your product. Larry 2017.04.10 18:42 About This Software This is exactly what I was looking for. It is the easiest and most accurate way to synch my iPod with iTunes. I will buy the pro version if I can buy more apps. My Account The best thing is that there is no need to download anything. In just a few seconds I could have all my music synched and ready to go. The files are really accurate. My ipod was downloaded to my computer and the app to my iPad, and there was no data loss or anything. The watermark is nothing too bad.
