On the other hand, the freeware version of SignCut Pro is certainly an alternative. FreewareSignCut is in fact free and comes with a lot of useful features, including InDesign, PDF, signwriting in up to 100 languages, thanks to a partnership between the program and some online companies. Also included in the package is Adobe Acrobat. But just like SignCut Pro, it does not include a watermark option. The site's success depends mainly on its members, who provide the site with information, reviews and forums. FreeSignCut is in fact a web site which is not affiliated to SignCut, in any way. So there is a clear attempt to separate the fact that freeSignCut is not a free version of SignCut Pro or anything else but a different site. Some good reviews for SignCut Pro over on ZDNet:- 1.
