Improved Player Detail For the first time, every player in your starting line-up will be modelled in greater detail and has a unique 3D model. Now you can dive into in-depth player statistics to learn about each of your starting 11. Whether it's making decisions based on a player's pace, strength, or aerial ability, The Men in Red have all of the tools to set the team up with the best 11 on the pitch. Tackle Detection Catching the ball without being able to see where you are going can prove tricky, but no more. In FIFA 21, players could sometimes score against their own team after a high-intensity tackle. This was done by the player's AI modeling an unreasonable reaction to being tackled, which caused them to receive a rash challenge. We've improved the system so that players will only come into contact with the ball after a successful challenge. This effectively prevents an unnatural result. More than 40 unique animation models Real-life animation and expressions are used in-game. Our team of animators and motion designers have worked closely with our developers to create more than 40 unique animations. They include: * Tackles * High-intensity, club-style challenges * Passing * Kick Off Incredible momentum changes Fifa 22 Cracked Version enhances the momentum system further. The system now represents a more realistic weight to the ball, taking account of the size, speed and height of players. The result is the ability to control a game-winning goal, such as Liverpool's Philippe Coutinho winner against Manchester City last season. In FIFA 21, a goal in the 91st minute resulted in less control and less purpose than a similar goal in the 87th. This is no longer the case in FIFA 22. Intuitive and fair goalscorer ratings Our goal-scoring simulations have been improved further. We've accounted for how much players influence the outcome of a game as they progress through the game. For example, Lionel Messi's influence was higher in his early seasons at Barcelona, as he was playing against a weaker opponent. In contrast, Zlatan Ibrahimovic's influence was higher during his final season, because he was
