With this program, you can create logos, banners, business cards, stickers, posters for websites, illustrations for books, posters, etc. In the program you can choose the color, size, type of lines, gradient, fill, text, etc. It is possible to work with outlines, textures, color and other images. It is possible to scale, draw over objects, resize and move fragments. The application allows you to easily crop, add text and shadows, control opacity and color. You can create pictures for websites and much more. Effects, gradients, masks to highlight objects are available for editing. The Transform tool lets you resize or rotate objects in space. The Drawing Tools menu lets you choose from a variety of drawing and filling tools. The Format menu contains commands for working with text, lines, and shapes. The Insert menu lets you select the elements you want, and you can also create a separate object from them. The Vector Graphics Operations menu lets you create image maps. You can also create Photoshop-style images. You can also edit Photoshop-style images using the options available in the Vector Graphics Operations menu. You can also create images using geometric elements. You can insert images into vector graphics projects and save them as Photoshop-style images. Operations with vector graphics Editing Images You can use the Brush tool to draw different images on the surface of vector graphics.
