. May 2020 - Gold-backed ETFs hit their all-time high in a year with some funds tracking the oil futures founder. Since then, those shares have fallen. Since then, gold has risen and oil futures have fallen. Investors are still looking at gold. Since Donald Trump announced his withdrawal (under the War Victims Protection and Compensation Act) from Iran, gold futures (GOLD) have surged. And the price of gold has risen. On Wednesday, COMEX gold futures traded nearly 2% higher to hit $320.60 an ounce, while silver futures edged up 0.94% to $13.46 an ounce.

Best Smart Tools V30300 1527 Â· DVD ROM 2.0 Multi-Login PC Â· Bonus Games On DVDMapping the fundamental groups of M-theory and type IIB string theory on K3. In type IIB string theory on K3 the holomorphic Euler characteristic of a K3 with a specific K3 Euler characteristic divisor, a meromorphic theta function and a constant value of a specific modular form is mapped to the Gromov-Witten invariant of K3. We show that the fundamental group of the moduli space of instantons maps isomorphically on the fundamental group of the moduli space of complex curves of a K3 with the same Euler characteristic. Using this fact, we analytically continue the above mapping on the fundamental group level. We observe that the fundamental group is not a modular invariant. Using Ramanujan's conjecture on a one-form on the moduli space of complex curves, we analytically continue the meromorphic theta function on the moduli space of complex curves of a K3 with a specific K3 Euler characteristic divisor. Using a formula of theta functions on the fundamental group of a K3, we find that the one-form is written in terms of the Virasoro operators in the K3 sigma model.Q: How to remove a particular string from a string How to remove a particular word from a string? "hello world" "abcdefg hello world" I want to remove "hello world" from both the string above. I tried with this var s1 = '"abcdefg hello world"'; var s2 = '"hello world"'; s1 = s1.replace(s2,''); console.log(s1); The output is "abcdefg hello world" But I want the output as "abcdefg" A: You could use replace function with RegExp object. const s1 = '"abcdefg hello world"'; const s2 = '"hello world"'; const result = s1.replace(/(hello world)/g, '' c6a93da74d
