The three fonts included are the font samples as they are on the associated web sites. I added them to avoid compatibility problems; if you have the PDF fonts and want the complete fonts, you may need to create a replacement.off file with OTF2OTF and possibly OpenTypeToUnicode. See Wikipedia on EOT for a more detailed explanation of the EOT binary format. Only a few days ago I found out that B9Creative, the reseller of the fonts, was working on OpenType support for all their fonts. Some of the fonts, including the fonts included in this zip are now available from B9Creative. B9creative is a small company that has been making fonts for a long time, including some of the fonts used in fantasy games, like GURPS, Chivalry, Heroes of Brittany and others. The FF Meta family, initially released as a commercial font in 1991, now comprises over sixty fonts. The FF Meta 2 family was released in 1992, the FF Meta Plus family in 1993, and in 1998 a facelift of the complete font family reclassified the FF Meta series and combined them into family-sets named FF Meta Normal, FF Meta Book, FF Meta Medium, FF Meta Bold and FF Meta Black. These are all available in Roman, italic, small caps and italic small caps. the ff meta pro family, initially released as a commercial font in 1991, now comprises over sixty fonts. the ff meta pro 2 family was released in 1992, the ff meta pro plus family in 1993, and in 1998 a facelift of the complete font family reclassified the ff meta series and combined them into family-sets named ff meta normal, ff meta book, ff meta medium, ff meta bold and ff meta black. these are all available in roman, italic, small caps and italic small caps.
