Universal brings The Bourne Identity to Ultra HD Blu-ray both as an individual release, and as a timed Best Exclusive, together in the Bourne The Ultimate Collection . The individual release comes as a two-disc combo with a flyer for the Digital HD version, which with Vudu, yielded the Vudu UHD version, complete with Dolby Vision and Dolby Digital Plus support. The Ultra HD Blu-ray disc is designated as a BD-66 and has Bourne disc art with a dark background, which is a little bit nicer than the blue and silver standard Blu-ray. (Not to mention nicer than a flipper disc.) The disc goes straight to the menu, and the menu features the same video loop as the Blu-ray but in full-frame and without the old familiar Universal menu design. Julia Stiles. Her character, Nicky Parsons, was about as onedimensional and under-utilized as any that appeared in the first two films, but with Marie (Franka Potente) out of the picture, she gets a bump into leading lady territory, and does a sparkling job (while the writing surrounding the character is as good as any). Her character arc cleverly pays homage to the role of Marie in Identity, from the streaks in her hair, to the bobbed dye-job she is given to conceal herself when her situation goes awry. You can almost see a character connection between Parsons and Bourne, but seemingly watch it all disappear due to Bourne's knowledge of what happens to anyone who associates with him, and what almost happened to his newfound ally. It's a compelling storytelling, to say the least. If there's one thing James Spader makes a habit of, it's a reflexive series of eyebrow raises when making any sort of bold statement, not to mention winking at the viewer. But even without those, there's still enough to note about The Bourne Identity that -should you just love it enough -- the first movie in the series will still likely be of interest to you. The high-octane action, which could have gotten a little too obvious at times, is balanced out by the slim, but effective character work.

I am so excited to welcome Sasha Fierce as she gets an upgrade in 'Jennifer Lopez: All I Have' a sequel to 'JLO: In the Zone.' If not, that is the perfect time to sit down and watch up to Season 3 of the ABC family drama. Kyle is a teen with the ability to talk to and understand computers, and thus an elite recruit in the Government's satellite defense project. (In English with Spanish subtitles) Jason Statham returns in 'The Mechanic' alongside Robert De Niro. When Statham's lead character arrives at a rustic hotel to investigate the murder of his former best friend (De Niro), he soon discovers

that the locals have something to hide. (In English with English subtitles) When one of the main characters in any sci-fi/action/thriller gets killed off in a movie, there is usually much consternation and disbelief. But with the ingenious way in which George Lazenby was introduced as James Bond in the seventh and final entry, you couldn't tell he wasn't 007 right off the bat. (In English with English subtitles) This new game entry in the 'Lemmings' series of games is an innovative take on the classic 'Lemmings' concept. The player must guide a team of Lemmings to their goal on a small island, by either jumping or climbing over traps and hills, while enjoying the hilarity of the alligators and piranhas trying to get through.
