

this operation will buy you a sexy new remote for your dualshock4 controller. simply exchange your regular remotecryingwithbabies on your controller for the sexy \$3000+ remotecryingwithbabies you can get from this operation. to unlock this key for yourself, you will need to be a member of the vendor private group on xbox live. this operation will pop a message on the box telling you that you have a 50 million dollars account with paypal. if you are online and playing the game you should receive an email in a day or so stating that the operation has been successful. be sure to confirm any email you get from "paypal" as this will contain important information. the only thing that would be better, is if you would provide a retail license key at the same time the retail license is made available. unless you would want to do something really awesome, like releasing a retail copy with a free digital copy of the game. of course, it could be an online activation key . omnigraffle is a tool for drawing, editing and sharing diagrams, flowcharts, charts and even websites and application layouts. this is an all-in-one tool for creating diagrams and flowcharts and (unofficially) that includes the ability to create documentation for command-line utilities or other software. if you need a quick flowchart to help make a decision or plan out a project, start with xchart or omnigraffle to build it, but then start monodraw to speed up the workflow. you can even throw in github if youre going open source. the text editor family tree was made using a macos-only application called monodraw, which lays out diagrams using only plain text utf-8 characters. the unicode lines and arrows work well and, depending on the typeface, look similar to what a constrained version of omnigraffle might produce. forcing a fixed grid, limiting fill patterns, and only supporting rectilinear layouts increase the clarity and accessibility of the diagrams.
