## Professional Ethics And Human Values By Raghavan Pdf VERIFIED Download

as to why the situation has been so volatile, many experts see that china's economy has entered a new phase after nearly four decades of rapid growth. compared with the past decade, from 2008 to 2017, the country faces low growth, high inflation, risks of an economic downturn and property bubbles. lacking sustained economic growth and property bubbles, governments across the world are paying more attention to the risk of the economy going into a new phase of expansion. the impact of the market on scholars has been examined recently in two papers, on graduate students' earnings (fung and semere, 2019 ) and on the cultural and spatial differentiation of professional ethics (raghavan et al., 2019 ). a paper that tackled ethical issues in recruitment was an interesting exception to the abovementioned pattern of the second wave of papers: it explored data privacy and employer oversight in online recruitment (basch et al., 2018 ). in addition to the aforementioned papers, we found five papers that reflected on the opinions of scholars, such as faculty (nayak et al., 2018 ) or doctoral students (deshpande and saxena, 2019 ). the overwhelming majority of papers were critical in nature, with very few papers that supported the use of ai in recruitment. however, even if the absolute number of papers was small, the recency of the ai literature makes its inclusion a distinctive feature of this second wave. consistent with the first wave, the debates on the use of ai in recruitment are characterized by the absence of a common normative framework and the dominance of the positive bias of "winning over" the other epistemic camp.
