What is special this time is that you will be controlling our first person, the character. As you progress through each level, you will be able to use a set of tools to change your appearance, move, jump, shoot and even create new objects. You should be in the body, looking at the main controls and be able to control the character's direction with the mouse. Even though you are controlling the "first person view" and not really controlling the character directly, he has physical traits, so when interacting with the world, he will react accordingly. Level 1 You begin in a small room. There is a small button on the left side of the window, labeled "OPTION". If you click on it, you will be able to turn on and off some special effects. Level 2 There are four more buttons here, "Move Left", "Move Right", "Jump" and "Jump Count". You can move up and down, left and right and jump through obstacles and an animated table. Level 3 There is one last button, labeled "Shift". This is used to slow down time and move the character with the mouse. Level 1 There are a few things to keep in mind here. First, we control a character named "Amy". For this tutorial, we will be making her jump. Here is how she is initially set up. Level 2 First, we will have to make her jump. This can be done by "SHIFT+J". There are a few keys that will be helpful, namely the "B" key to turn the camera on, the "N" key to change camera views and the "S" key to select the camera angle you want (normally either Top or Bottom). Level 3 Here we are going to slow the game down.
