Download Drivers Notebook Acer Aspire One Kav60

i need to install windows 7 pro on my acer aspire one, but after i upgrade to windows 7, the driver for the wireless network card is not working. if i restore the laptop to the factory settings, the driver for the wireless network card is not working. if i install the windows 7, the wireless network card is not working. i need to install windows 7 pro on my acer aspire one, but after i upgrade to windows 7, the driver for the wireless network card is not working. i had a lot of problems trying to install windows 7 on my acer ao-a150. i was able to install it, but it only appeared in my computer as a gray box. everything else worked fine. there were some files on the hard drive that were not extracted, and i had no idea what they were. so i had to restore my files from a backup. after that, i was unable to use the computer at all, due to the problem with the graphics. i tried to install the 32 bit driver, but i couldn't find it. it was very frustrating. i was able to download the 64 bit driver from another site and it worked fine. i'm very happy with the way everything worked out. hi there! i have an acer aspire one a150-1134 notebook and i am trying to install windows 7. i have downloaded the 32-bit version and am trying to create the bootable usb drive with it. i have been trying to find a way to boot from the usb drive that won't fail after booting from the drive and i have not been able to find a way to do it. i have tried booting with the settings so that it will go through the windows 7 installation and have it install it from the usb drive but i can't get it to boot correctly. i have tried windows 7, vista, and xp. i have tried the usb booting with a usb drive that is already bootable to see if that would work. i have tried the usb drives in the external usb2.0 ports and the internal usb2.0 ports on the notebook. i tried them in both the esdi (easiest way to do it) and the lpt (lifepath) setting. i have tried with and without the external power supply attached. i have tried to boot from the usb drive and it failed to boot. i have tried booting from the usb drive using a friend's windows 7 install disk that had the bootable flag set on it. i have tried uninstalling all of the drivers that are currently installed in device manager and then reinstalling them. i have tried booting from the usb drive with any of the settings in device manager. i have tried booting from the usb drive with the settings in device manager to boot from the usb drive and then having it install from the hard drive. i have tried booting from the usb drive and doing a search for the drivers and installing them through device manager. i have tried installing the drivers from the 64 bit version of windows 7. i have even tried booting from the usb drive with the settings in device manager to boot from the usb drive and then having it install from the hard drive. i have tried to boot from the usb drive with the settings in device manager to boot from the usb drive and then having it install from the hard drive. i have tried to boot from the usb drive with the settings in device manager to boot from the usb drive and then have it install from the hard drive. i have even tried booting from the usb drive with the settings in device manager to boot from the usb drive and then have it install from the hard drive and then to have it install from the usb drive. i have tried booting from the usb drive with the settings in device manager to boot from the usb drive and then have it install from the hard drive and then to have it install from the usb drive. 5ec8ef588b
