
Atmospheric And Oceanic Fluid Dynamics: Fundamentals And Large-Scale Circulation Books Pdf File

ATM S 60 Atmospheric Dynamics of Maritime Boundary Layers (3)Modeling of atmospheric motions over a developing frontal boundary layer, boundary layer exchange of mass, momentum, and energy, drag reduction, and the transformation of the circulation between interior and exterior environments. Prerequisite: ATM S 542 View course details in MyPlan: ATM S 60 ATM S 562 Introduction to Meridional Circulation (3)Review of leading theories of large-scale circulation, especially circulation modes of the northern and southern hemispheres. Why is the Earth's surface not stationary? Models of circulation with a vertical component, expressed in terms of equations of motion. Concept of uniform mean flow, concept of forcing by the oceans, and the use of spectral theories of large-scale circulation to model. Prerequisite: ATM 542. Offered: Summer This course introduces the dynamics of the ocean and atmosphere in a physical sense. Among the topics covered are ocean currents and dynamics, the thermodynamic properties of water and its interactions with air, the dynamics of the atmosphere including atmospheric pressure and its effect on weather, sea level, tidal forces, wind and wave, and climate dynamics. Loadline and tonnage regulations, trim and stability books and industry software are studied. Emphasis is placed on application of the theory as related to ship systems and tanks. This course provides an overview of atmospheric and oceanic physics, and the role these physical processes play in the global carbon cycle and climate. Topics include: the factors controlling carbon dioxide and methane concentrations in the atmosphere; climatic influence of changing carbon cycle processes; geographical variations in circulation patterns; and the role of ocean dynamics and sea ice in the global carbon cycle. Students complete a research paper on an aspect of carbon cycle-climate interactions. The course is divided into two parts: basic courses in atmospheric and oceanic physics. Prerequisite: ATM S 545/OCEAN 545.

Fundamentals And Large-Scale Circulation Books Pdf
File**

ATM S 367 Special Topics in Ocean Fluid

Dynamics (3) Finite
element method,
oceanfront boundary-
layer flows, large-
scale circulation,
physical and
numerical
oceanography, wave
forecasting, coastal
circulation, and
coastal
geomorphology.
Prerequisite: ATM S

509/OCEAN 512 or
permission of
instructor. Offered: A.
View course details in
MyPlan: ATM S 367
ATM S 500 An
Introduction to
Atmospheric Physics
(3)A first-year course
in atmospheric
physics and gas
dynamics for physics
majors. Important

connections between atmospheric physics and weather and climate. Prerequisite: ELECTR 501 (physics), or STATUS 3100 and 3101 (fall semester, previous year); or permission of instructor. Offered: jointly with OCEAN 520/ECOL 503/OCCL 503/ATM S 510/ECOL

509 and ATM S
510/ECOL 509. ATM S
530 Introduction to
Atmospheric
Chemistry (3)A first-
year course in
atmospheric
chemistry for physics
majors. Theory of the
major atmospheric
gases; chemical
kinetics in the
atmosphere;

atmospheric
hydrology and
tropospheric
chemistry;
thermodynamics of
the atmosphere;
secondary
atmospheric chemical
processes.

Prerequisite: ELEC
501 (physics) or
permission of
instructor; or ELECTR

501 (physics), or
STATUS 3100 and
3101 (fall semester,
previous year); or
permission of
instructor. Offered:
jointly with OCEAN
522/ATM S 522;
OCEAN 522/ECOL 522
and ECOL 522/ATM S
522. ATM S 530+
Chemistry of the
Atmosphere

(3) Introduction to atmospheric chemistry and its applications. Atmospheric chemistry, the atmosphere and the Earth's biosphere; major atmospheric gases and their chemical kinetics; chemical reactions in the atmosphere;

atmospheric
hydrology and
tropospheric
chemistry;
thermodynamics of
the atmosphere;
secondary
atmospheric chemical
processes.

Prerequisite: ELEC
501 (physics) or
permission of
instructor; or ELECTR

501 (physics), or
STATUS 3100 and
3101 (fall semester,
previous year); or
permission of
instructor. Offered:
jointly with ECOL
522/ATM S 522 and
ECOL 522/ATM S 522.
