Johnathan Wade, has devised a new dimension-cracking algorithm that they have given the name Rybka. Check out the trailer below. The game is expected to be released in August. The PC version of the Grand Theft Auto game was released a few weeks ago, and it sold more than a million units in the first three days. Being that this is one of the biggest video games of all time, Rockstar had to figure out a way to take advantage of the Internet, and so they have released a new version of the game - GTA Vice City. This version of the game is very similar to the original, but is it as much fun as its successor? Maybe not, but it is definitely worth it for those who already own GTA San Andreas. . .
