Black Ops II (Intelligence Ops, Extraction & Extortion) begins with a real-time, action-packed tutorial video that will help you to get comfortable with the included Xbox 360 Controller for the first time. Set in the gritty, volatile chaos of a future world gone awry, you will experience rich and visceral storytelling where you have the freedom to become the hero, or the villain. In addition to cinematic storylines, players will encounter skirmishes and challenges that will test and reward the most skillful. Multiplayer is also where you will encounter the greatest challenges. New modes, maps, and weapons will require fast reflexes and reflexive abilities for real battle. Black Ops II brings players face to face with a fully realized combat experience that ranges from intense close combat to long-range, all-out war. \*Battle in varied and dynamic environments using new weaponry and customizable equipment. \*Fight through cinematic story sequences, or experience a free-form, open-world gameplay style. \*Online matches take place in one of 12 diverse maps. \*Search the open world for a variety of hidden and familiar weapons, vehicles, and gear. In many movies, there are scenes that are intentionally created to make the environment look realistic. Due to this, the player needs some time to load the movie, and to make the environment and the people on-screen look and move the way they should. So, the video might start to lagg out, and when this happens it causes a bad experience for the audience. This is why it is very important to make sure that the video you are broadcasting is at a decent guality so that the people watching can enjoy every minute of it. 5ec8ef588b
