fhg is a family oriented, easy to learn and use software for family history research. it is both a single name search program as well as a genealogy research program. fhg is a genealogy program that searches genealogical databases. it can be used to research a single person, a family, a group of families or a particular surname. fff (gif animator - freeware for windows) is a freeware program which will allow you to view and edit animation gif files. you can edit gif files without losing their original quality and format (as long as they are in gif format). the program sits somewhere in the middle - being both a name catalog and a reputation/achievement system. the basic idea is that as you gain reputation for certain achievements, you gain access to certain factions, and certain factions will grant you access to special quests and rewards. the program is designed to make it simple for you to convert data from your game files (like save files, character files, etc.) to tables. it has a simple, easy-to-use interface that will allow you to create and edit tables for your characters in your game files and export them to your game's save file. if you are a perfect world player who would like to play without using the prime account matchmaking, you can buy the id verification service at the in-game perfect world net shop. you can click "id verification" on the menu bar, and then use the in-game menu bar "perfect world account" to purchase the id verification service. after the id verification is done, the player must use the in-game menu bar "perfect world account" to download the perfect world patch (pc), and then the player can use the in-game menu bar "perfect world account" to join the perfect world server.
