## Total War Attila 1220 Mod

total war attila 1220 mod The fleet of war in the Mediterranean. It was almost impossible to take it under control even with the new control system. I can only think of two things to do with it: 1) use it while using the new control system, then the new control system will get used and the fleet will become under control. 2) use it until the fleet becomes under control and then destroy it or take it to other enemy territory. How can I control the warfleet using the new control system?
