Hello tecmo. Thank you for contacting us. In order for us to remove the bios password from your Dell computer we will need to talk with your computer over the phone. Please follow the instructions below and we will take it from there. 1. Give us the model of your Dell computer. 2. When you hear beep you may say your Dell computer model. 3. When you say the model please say the last letter. 4. When you hear beep please say your password. 5. Please hang up and call us with your Dell computer model number, when beep first said you said your Dell computer model. Thank you and have a great day. We can look at the BIOS and see if there is something that would give us the password but without it being in the laptops controller itself, our only option is to ask you to give us details about your laptop and when the bios was set. Hi, I've worked on a few laptop models, but after going through all the resource pages and old articles I found on the internet, I think that i got stuck. My model is a D100-A11R. Here is the model number: D100-A11R. The model number and the instruction to unlock the BIOS have been removed by a factory. I could not find anything on the net relating to the password code. I asked my technician friend, and he told me that he didn't know how to unlock the password.
